

Project Information

Project: Disaster Tweet Classification

Algorithm Used: Logistic Regression

Dataset Size: 10,873 Tweets

Tech Stack:

- Python
- NLP
- TF-IDF
- Scikit-Learn
- Streamlit

Disaster Tweet Classification

Enter a tweet below and the model will predict whether it is a **Real Disaster Tweet** or **Non-Disaster Tweet**.

Enter Tweet

Massive earthquake hits california

Predict

This is a **REAL DISASTER** Tweet.
